

TECHNICAL BULLETIN

ULTIMATE BLACK TIRE COATING

Ultimate Black Tire Coating is our most advanced tire coating. It provides a long-lasting shine that gives tires that deep, black wet-look without sling. Ultimate Black Tire Coating also contains advanced hydrophobic polymers to create a water & wear resistant coating that will not peel or crack over time.

Part #: G16008 - 8 oz aerosol

Packaging: 6 per case

Features:

- Deep black glossy shine
- Extreme durability – lasts for over a month

pH: N/A

Paintable: No

Dilution: RTU (Ready to use)

Application Method: Spray on

Directions: **SHAKE WELL BEFORE USING.** Apply on a cool, clean & dry tire in a well ventilated area. For best results, thoroughly clean tire to remove dirt and previously applied tire dressing. Hold can 4 to 6 inches away and spray directly onto tire in a thin, uniform pattern. Wipe off any overspray from wheels and paint immediately. Allow at least 1 hour from application before driving. Product will fully cure in 24 hours. **TIP:** To enhance shine over time simply re-apply a thin coat of the product over the existing Ultimate Black Tire Coating. **NOTE:** Use only as directed. Do not over apply to avoid spin-off onto painted surfaces and plastic panels. If any spin-off or overspray occurs, remove immediately.

DO NOT USE ON MOTORCYCLES, BICYCLES OR OTHER TWO-WHEELED VEHICLES OR SURFACES THAT SHOULD NOT BECOME SLIPPERY.

Do not apply to the tire tread. Avoid getting product on cement or asphalt. If you do immediately clean with a detergent to prevent staining or slippery conditions. Store and transport in a secure, upright position.
